MAKING FINDINGS AND PROVISIONS RELATING TO METRO'S DISADVANTAGED BUSINESS ENTERPRISE PROGRAM ("DBE PROGRAM").

WHEREAS, METRO has reviewed various documents, studies, and other evidence concerning the markets in which METRO purchases goods and services; and

WHEREAS, METRO finds it appropriate to adopt findings relating to these markets and METRO’s DBE Program;

NOW, THEREFORE, BE IT RESOLVED BY THE BOARD OF DIRECTORS OF THE METROPOLITAN TRANSIT AUTHORITY THAT:

Section 1. METRO requested and obtained from National Economic Research Associates (NERA) a thorough and comprehensive analysis of disparities in construction, commodities, and service industries in the Houston area, which METRO finds to have conclusively demonstrated the existence of past and present discrimination with respect to minority - and woman-owned business enterprises in the Houston area in the markets in which METRO participates. This discrimination exists with respect to businesses owned by women, African-Americans, Hispanics, Asians, Native Americans and other minorities as identified by the U.S. Census. METRO adopts the findings in that study.

Section 2. The evidence and conclusions of the NERA study are consistent with and supported by the February, 1995 Disparity Study for Houston City Government conducted by D.J. Miller and Associates, the December 1994 "State of
Texas Disparity Study" by NERA, and other statistical and anecdotal information reviewed by METRO.

Section 3. The studies and information referenced above and evidence collected through other sources reveal significant disparities between the availability and utilization of minority- and woman-owned business enterprises in the markets in which METRO purchases goods and services.

Section 4. Demographic and business data developed through statistical studies and other sources demonstrate that but for METRO’s Disadvantaged Business Enterprise Program (DBE Program) significant disparities would exist between the participation of minority- and woman-owned business enterprises and that such disparities are the result of systematic race and gender discrimination in the markets from which METRO purchases goods and services.

Section 5. The available community of minority- and woman-owned business enterprises constitutes a significantly under-utilized source of entities and individuals ready, willing and able to provide goods and perform services for METRO and METRO’s prime contractors.

Section 6. METRO finds that a program encouraging the participation of minority- and women-owned business enterprises in METRO’s projects is necessary to overcome race and gender discrimination.

Section 7. METRO finds that but for continued efforts, including METRO’s DBE
Program, to insure equal opportunity for all businesses in the markets in which METRO purchases goods and services, METRO would be a participant in a system of race and gender discrimination.

Section 8. METRO finds that measures adopted to address discrimination should be narrowly tailored and should be complemented by race- and gender-neutral measures designed to encourage the participation in METRO contracts and procurement by demographic groups that have suffered the effects of discrimination.

Section 9. METRO finds that race- and gender-neutral programs by themselves are inadequate to address the race and gender discrimination that exists in markets in which METRO procures goods and services. A program that takes race and gender into account is necessary to break down patterns of deliberate exclusion of minority- and woman-owned businesses.

Section 10. METRO finds that METRO’s DBE Program and any other remedial measures adopted by METRO to address discrimination practices should be maintained only for so long as the continued existence and effects of such discriminatory practices remain evident, and that METRO’s efforts should therefore be periodically reviewed to assess whether and to what extent there is a continuing need for remedial measures.

Section 11. METRO finds that the DBE Program is narrowly restricted in scope to remedy the identified disparities and discriminatory practices and is subject to
termination at such time as periodic review reveals that the DBE Program is no longer necessary to prevent discrimination in METRO contracting.

Section 12. METRO directs its staff to provide the METRO Board annually with a review of METRO's DBE Program and the continued need for such a program.

Section 13. This resolution is effective immediately upon passage.
