2007

Mar.

June

Sept.

Prelim Engng & Final EIS

Public input on station locations, mitigation measures, station area development, property access and aesthetics.

2008

Jan.

June

Aug.

Final Design

Public input on station art and landscaping. Public input on construction staging and mgmt.

Construction

Public coordination on construction.

Public involvement

Public outreach will take place through three primary categories:

- Residential groups,
- Business groups,
- General Town Hall Meetings

Public input may come in the form of METRO public meetings, civic group and stakeholder meetings, phone calls, e-mails and written letters. A public hearing will be held at the end of the Draft EIS.

Specific dates and milestones subject to scope and schedule developed with engineering and environmental consultants.
