You are working around a precious resource—young people—so please use caution in your daily activities.

**ENSURE PUBLIC SAFETY**
Your number one priority is the safety of pedestrians and drivers near your worksite

**WATCH FOR STUDENTS**
Keep an eye out for students who may not realize the workings of a construction zone

**DIRECT TRAFFIC**
Have a flagger or off-duty police officer present when you are working near a school

**POST SIGNS**
If a crossing is closed, install appropriate signage to direct pedestrians to an alternate route

**SLOW DOWN**
When driving your company vehicle, maintain a safe speed

**KEEP YOUR DISTANCE**
Do not move equipment within close proximity of students
